NAME/KEX: gene
LOCATION: (1)..(1747)
OTHER INFORMATION: Full length cDNA sequence fragment of Human AMPK
OTHER INFORMATION: fragment begins at nucleotide 24 and ends with
OTHER INFORMATION: nucleide 1765

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 '(gnz 6/ptodata/2/pubpna/USO7 PUBCOMB. seq:*
